

## Airless Jackhammer™

The Airless Jackhammer™ works by manually drawing up the slide hammer and slamming it down the top of the chisel bit, producing a striking force of up to 5000 lbs. It strikes where you direct it, won't glance off like hammers and picks. The Airless Jackhammer™ will break and cut concrete, asphalt, ice, stone, frozen ground and granite monuments. Accessories above are: 2x2" wood stake driver, 3/4"-1 1/2" ID pipe driver and a rebar driver (up to 3/4" OD). Uses standard 1 1/8 x 6" shank jackhammer bits. Weight 25 lbs. Length 53" closed. Other bits can be special ordered.

- Item No. 260c - Airless Jackhammer™  
 (includes 1" chisel point) ..... \$329.95 Ea.
- Item No. 262b - Stake Driver Bit..... Specify .... \$109.95 Ea.
