

Declination

Date 1915-06-15

Latitude 33° 19' 44" N

Longitude 111° 52' 25" W

Elevation 0.0 km GPS

Model Used IGRF12

Declination 14° 20' E changing by
0° 2' E per year

Compass shows the approximate bearing of the magnetic north (MN)

Magnetic declination is the angle between true north and the horizontal trace of the local magnetic field. In general, the present day field models such as the IGRF and World Magnetic Model (WMM) are accurate to within 30 minutes of arc for the declination. However, local anomalies exceeding 10 degrees, although rare, do exist.
